Can you REALLY Improve Your Odds?

Absolutely. Even the Lotto companies themselves tell you so.

How? There are two recommendations that always come up:

- a) **Play a System Entry and**
- b) **Form a Lotto Syndicate / Lotto Club.**

Do these recommendations make sense? Definitely.

Take the following example from a 49-ball lottery :

- A single 6-number entry has a 1-in-**13,983,816** chance of winning;
- An 8-number system entry has a 1-in-**499,420** chance of winning;
- A 10-number system entry has a 1-in-**66,589** chance of winning;
- A 12-number system entry has a 1-in-**15,134** chance of winning;
- A 15-number system entry has a 1-in-**2,794** chance of winning;

For a 40-ball lottery, the figures are :

- A single 6-number entry has a 1-in-**3,838,380** chance of winning;
- An 8-number system entry has a 1-in-**137,085** chance of winning;
- A 10-number system entry has a 1-in-**18,278** chance of winning;
- A 12-number system entry has a 1-in-**4,154** chance of winning;
- A 15-number system entry has a 1-in-**767** chance of winning;

**In summary - Playing a 15-ball entry improves
your odds OVER 5,000 TIMES!**

The problem is - System Entries are expensive.

- A System 8 requires 28 games
- A System 10 requires 210 games
- A System 12 requires 924 games

If you can afford to play a System Entry, we recommend you do, preferably sharing the cost with friends.

If you can't, let's look at the next-best alternatives.

We have picked the best free lotto systems from several websites on the Internet. Check them out. Visit the websites. Then make a judgement.

Let's suppose you wanted to Improve your Odds by 33% - How would you do it? By playing a System 8. Instead of just six numbers to pick the winners (requiring a 100% success rate), choose eight numbers - a 33.33% increase that allows you to get two wrong and still walk off with First Prize. Sorry, ride off, probably in a Ferrari !

At this stage you need to make a choice. At \$1 per game, you need \$28 plus agents commission. What do you do if you only have \$5 ? Either:

- ◆ Find 5 friends, each with \$5, giving you \$30 in total - and off you go, or
- ◆ Decide the best entry you can play for \$5.

Surprisingly, there is a very effective way to play eight numbers - if you know the secret of combining them properly - that guarantees First Prize and costs under \$5.

Let's suppose you chose the following eight numbers:

3 8 15 20 23 28 35 42

Before you go any further, circle six of these eight numbers.

Here's how to combine the eight numbers for the best results less than \$5.00:

Game 1:	3	8	15	20	23	28
Game 2:	3	8	15	20	35	42
Game 3:	3	8	23	28	35	42
Game 4:	15	20	23	28	35	42

Now check off the six numbers you chose previously. How did you do? Pretty effective, huh ? You will **ALWAYS** have Five or Six winning numbers together if you have all six winning numbers in your eight.

*** LOTTOMASTA's HOT TIP *** If you play them as **FOUR PAIRS**, eg

3 & 8 15 & 20 23 & 28 35 & 42

You are **GUARANTEED First Prize** if you have any **three pairs correct**.

We agree - it is not as good as a full system 8 - and if you can afford all 28 games, we highly recommend you play the full system 8. If not, this four-game arrangement is pretty neat.

What's the **Magic Formula** ? This is -

Game 1:	1=	2=	3=	4=	5=	6=
Game 2:	1=	2=	3=	4=	7=	8=
Game 3:	1=	2=	5=	6=	7=	8=
Game 4:	3=	4=	5=	6=	7=	8=

No matter what 8 numbers you choose, substitute your 8 numbers for the 1 to 8 above and you are guaranteed:

- ◆ **First Prize** if any 3 pairs (1/2, 3/4, 5/6, or 7/8) include the six winning numbers
- ◆ Five or Six winning numbers together if you have six winning numbers anywhere in your eight
- ◆ Five winning numbers together if you have five winning numbers together within any 3 pairs
- ◆ Four winning numbers together if you have four winning numbers together within 2 or 3 pairs

Here's how the conversion looks:

1:	1=3	2=8	3=15	4=20	5=23	6=28
2:	1=3	2=8	3=15	4=20	7=35	8=42
3:	1=3	2=8	5=23	6=28	7=35	8=42
4:	3=15	4=20	5=23	6=28	7=35	8=42

Magic Lotto System - or Snake Oil ?

There are some great Lotto Systems on the Web. There are also plenty of B-S systems, snake oil peddled by people with no respect for their customers. So how do you tell which is which ?

- a) **Does the System have a Guarantee? If not, avoid it like the plague.**
- b) **Are they prepared to give you a Free System you can test? If not, ask yourself - why not?**
- c) **Does the System have a 100% Money Back Guarantee ?**

The Magic NINE Number Lotto System

Dramatically different - that's the boast of www.lotto-magic.com and boy, are they different! Check out how many winners you can get from just 21 games!

You probably already know a system 9 requires 84 games. The version below requires 21 games - Saving you \$63 a week or \$3,276 in a full year. Let's suppose you want to play the following 9 numbers:

1, 7, 15, 18, 23, 28, 35, 40 & 45.

The left-hand column below shows the basic system, using numbers 1-9.

The middle column shows your 9 numbers, after substituting them for our 1-9.

The right hand column below gives the Guarantees - brilliantly effective !

The Basic 1-9 Lotto System	Your 9 numbers, when converted.	A "LottoMasta" System, Giving these Guarantees :

- **LOTTOMASTA's HOT TIP** * Play six of these 9-number systems - and you can cover 54 numbers ! Get friends to form a small Syndicate. Each one of you plays 9 different numbers, covering all the numbers in your lottery, using the above system (or a cheaper / different system from one of our books). For a 49-ball lottery, you can play 5 numbers a second time.
- If you play a 45-ball lottery, 5 of the above covers all the numbers
- If you play a 36-ball lottery, 4 of the above covers all the numbers

This technique is covered in detail in the Pro Version of the LottoMasta's book "Winning Lotto - Secrets The Experts Don't Want You to Know" - see "The Lotto Buster" and "The Saturday Night Special" chapters for even better ways to use the "LottoMasta Guaranteed Winning Numbers Strategy™."
